THIS LISTING

*Sold by [Bricas1975](#) to [coloradocally](#) for USD \$39,500
November 30, 2022*

This 2015 Jeep Wrangler Unlimited is a Rubicon Hard Rock edition powered by a replacement turbocharged 3.6-liter V6 mated with an ATS Diesel Performance stage-2 five-speed automatic transmission and a dual-range transfer case. The truck was modified under previous ownership with a King Off-Road Racing suspension lift, 17" Black Rhino wheels, a Magnaflow exhaust system, a rooftop tent and awning, cargo-area storage bags, a B&M shifter, Baer brakes, auxiliary LED lights, a six-point roll cage, and a Smittybilt X20 winch. Additional equipment includes locking front and rear axles with a front sway-bar disconnect, 5.13:1 gears, heated seats, a body-colored Freedom hardtop, and a CB radio. The truck was recently acquired by the selling dealer and the oil was changed in preparation for sale. This Jeep Wrangler has 59k miles and is now offered with a clean Carfax report and a clean Pennsylvania title.

The body is finished in Bright White, and exterior features include a body-colored Freedom hardtop, LED headlamps and taillights, Rock Slide Engineering rock sliders, tinted windows, flat fender flares, PIAA auxiliary lights, a Smittybilt X20 12,000-lb

winch, rocker panel protection, and an LED light bar. A rooftop tent and awning are mounted to a Gobi roof rack.

Black Rhino 17" wheels are mounted with 37×12.5" Nitto Trail Grappler M/T, and a matching spare is mounted to a Smittybilt swing-out carrier out back. The suspension features King Off-Road Racing and Terraflex components as well as JKS adjustable sway bar links front and rear. A Baer front brake kit is reportedly fitted up front.

The cabin has been fitted with a Smittybilt six-point roll cage and features seats upholstered in black leather with silver contrast stitching. Amenities include air conditioning, power locks and windows, heated seats, and a touchscreen stereo with Bluetooth capability. B&M gear and transfer case shifters have been installed along with a Uniden CB radio.

The leather-wrapped steering wheel frames a 100-mph speedometer, a tachometer, and auxiliary gauges. The digital odometer indicates 59k miles, less than 25 of which were added by the selling dealer. AEM gauges for boost and air/fuel ratio are mounted to the left-front pillar of the roll cage.

The cargo area features an XG Cargo storage system and an all-weather floor mat.

The replacement 3.6-liter V6 is fitted with a Prodigy Performance stage-2 turbocharger and aftermarket cylinder head studs. A Genesis Offroad dual battery kit is fitted, and service completed in June 2021 noted on the Carfax report included replacing the head gaskets, valve cover gaskets, front cover gasket, intake manifold gasket, thermostat, and radiator.

Power is routed to the rear or all four wheels through an ATS Diesel Performance stage-2 five-speed automatic transmission with a deep sump oil pan. The differentials have been fitted with 5.13:1 gears and heavy-duty ARB differential covers. A dual-exit Magnaflow exhaust system is installed.

The Carfax report indicates no accidents or other damage and lists registration history in North Carolina, Pennsylvania, and Florida.

Wow! Looks like someone just made \$20k or so – unless there is something major wrong with the rig. This thing rocks.

GalaxiesAndGhias 👍 39

Unfortunate the seller didn't give more info on requests such as videos. I could see this going much higher had seller been on top of things. Can't trust the engine and that everything is together for a long distance first drive cross country or what not. Hopefully buyer is able to immediately enjoy and is problem free. GLWA

Escaping 👍 107

There we go! I knew this build had a lot more room in it... especially given what dealers are trying to sell a stock JKU Sport edition for here in the Chicago area.

Beautiful Jeep. Also curious about what numbers it makes. And why not just do a Hemi swap? But nonetheless an awesome build

Hey seller, if I pick it up in person, is there sales tax? If so, how much? Think it's ready to be driven across country?

Any chance to get a video of it running and driving?

Flag as not constructive

Nov 29, 2022 at 10:44 PM

Bricas1975 (The Seller)  51

There was approximately 56k miles on the Jeep when the owner replaced the engine. The engine was BRAND NEW that was put in. here is a list of everything in it.

[@Bricas1975](#) What was the mileage of the Jeep and of the replacement engine at time of installation?

Flag as not constructive

Nov 29, 2022 at 8:36 PM

Bricas1975 (The Seller)  51

Yes....The vehicle would carry no restrictions from being titled and /or registered in CA. Would certainly pass any emissions or on-road capability tests

[@xenowulf](#) really

As for why those gaskets were changed. My assumption would be the increased cylinder pressure from the turbo caused a head gasket failure. In order to fix that, and install head studs, all of the other parts listed to have gasket changes have to be removed so it only makes sense new gaskets were installed at that time. My feeling is this jeep was used for the way it was built. I wouldn't be expecting a cream puff that was driven by an older lady just to church on sundays. That being said, there appears to be a lot of high quality expensive parts used in this build.
